**RESULTS FROM LAS VEGAS**

The bigger crowds from the past seemed to return to Las Vegas for the World of Concrete show last month. The aisles were full (most of the time), and as an exhibitor, it's always nice to be busy! Here are the official numbers:

60,110 registered attendees

1,523 exhibitors

743,889 square feet of exhibits

The following quote, and an interesting observation, was found in the World of Concrete Daily News – Post Show issue: *“...I am amazed by the diversity everywhere at WOC. From the people in fine Italian suits to the folks wearing faded jeans and worn-out work boots, from the 18 to 81 year olds, and to the obvious multiculturalism where people from across the globe converge in turbans, cowboy hats, or flat-billed baseball caps, WOC clearly represents everyone who is interested in concrete.”*

**AFTER WINNING THE SUPER BOWL, DID I HEAR PEYTON MANNING SAY:**

***“I’M GOING TO BAUMA NEXT MONTH!”***

OK, probably not. But as we have said before, it's almost as big as Disneyland. And, like Disneyland, you can't see it all in one day. If you are in the construction industry, #1 on your bucket list should be to attend the BAUMA Show in Munich, Germany. It is every three years, and 2016 is time – and it's next month: April 11 – 17.

BAUMA - 146 ACRES OF FUN (exhibit space)

DISNEYLAND – 160 ACRES OF FUN

**MORE ON BAUMA 2016**

E-Z Drill is excited to be a part of Bauma again this year. At right is a map with an arrow pointing to our location. We are in the USA Pavilion in Building C4.

Our official booth number is: **C4. Stand 615/A**

**“USED” DRILLS AVAILABLE**

**MODEL 210B SRA s/n: AC-5087**

We don't have many "used" drills available right now – *they are just too darn popular to keep around!* But keep checking back with us, and especially the "USED EQUIPMENT" page on our website, as this can change daily.

**CONGRESS PASSES “FAST ACT”**

As I'm sure most of you know, Congress finally passed a five-year funding mechanism that is intended to improve the nation's surface transportation infrastructure. It doesn't have everything we wanted or need – what legislation does – but it should give our paving industry a much needed boost, and a little bit of stability for the next five years.

**BEFORE YOU START USING YOUR DRILLS AFTER SITTING ALL WINTER**

- Make sure you have rock drill oil in the oilers
- Grease all grease points
- Make sure all tires are properly inflated (if they are not foam-filled)
- Install the proper sized bushing to fit the drill bit to be used
- Check all hose connections
- Check all nuts and bolts for tightness
- Replace any cracked, weathered, or leaking hoses and fittings
- Blow out main air hose from the compressor before hooking up to the E-Z Drill

**DID YOU KNOW?** In 1935, Jesse Owens set six track and field records in less than an hour. (*Man, he did everything fast!*)
